You Are Invited to Participate in National Survey on Rural Community, Economic, and Workforce Development Priorities

The four Regional Rural Development Centers invite rural-focused leadership and professionals working on issues of community, economic, and workforce development to participate in a national survey. The survey is the first phase of a process aimed at identifying key priorities and critical investments for rural communities' recovery and growth. The process is implemented by the RRDCs with support from the Extension Foundation through the New Technologies for Agricultural Extension accelerator program. The RRDCs ask rural development professionals to (1) complete the survey below and also (2) share the survey with those in their networks engaged in community and economic development activities. **We ask that all surveys be completed and submitted no later than October 6.** Timely completion will ensure that responses inform a preliminary report that will be shared by the RRDCs with USDA NIFA and other federal partners as stakeholder feedback.

community leaders.

Dr. Michelle Eley has spent nearly 18 years with Cooperative Extension at North Carolina A&T University building programs, training staff on efforts focused on community, organizational development, leadership development, food systems planning, emergency preparedness, and civil dialogue/discourse. Eley was recently recognized for her work by being named the 2021 nominee for the Excellence in Extension Award from the 1890's Region in the area of Community and Rural Development. Her most recent funded project is Youth Stepping Forward. Funded through the National 4-H Council, the program teaches youth in six underserved counties skills in decision making and problem solving so they can address the issues facing their communities. The youth program is modeled after the successful Community Voices program, an Extension at A&T initiative that trains adults to be

Dr. Bob Kemerait is charged with providing Extension outreach to agents and farmers for disease and nematode management of peanut, corn, cotton, and soybeans. These crops are planted on around 2.5 million acres annually, and University of Georgia (UGA) Cooperative Extension agents in well over half of Georgia's 159 counties must be able to effectively address disease and nematode management issues to help mitigate potential losses affecting grower profitability. Kemerait has worked for more than 21 years to develop a program that supports, trains and mentors UGA Extension agents, graduate, and undergraduate students from UGA and Abraham Baldwin Agricultural College, and the diverse staff whom he employs.

Regional Spotlight

Fort Valley State Collaborates with Veteran Organization to Educate New Farmers

A middle Georgia veteran's organization recently received a federal grant with assistance from Fort Valley State University's (FVSU) Cooperative Extension Program. Joy Moten-Thomas, FVSU's assistant administrator for Community Development and Outreach authored a \$750,000 grant proposal to the U.S. Department of Agriculture's (USDA) National Institute of Food and Agriculture (NIFA) Enhancing Agricultural Opportunities for Military Veterans Grant Program.

The grant proposal will benefit Striving to Achieve Greatness Vets (STAG Vets Inc.) a non-profit founded in 2014 by retired U.S. Army veteran L. Jonathan Jackson. Located in Milledgeville, Georgia, STAG Vets Inc. is a program created to assist veterans who are homeless, in need, suffering from post-traumatic stress disorder (PTSD), and traumatic brain injury.

Jackson briefly discussed why he sought FVSU's help in seeking federal funding. "I heard about this grant through Joy Moten-Thomas, and we discussed the possibilities of how it would enable STAG Vets Inc. to reach a greater portion of veterans in the Middle Georgia area," Jackson said. Furthermore, the army veteran stated it was important to him to have FVSU represented because of its status as a Historically Black College and University (HBCU).

From August 1, 2020, to August 1, 2023, the funds will cover costs including webinars, workshops, agribusiness tours, and courses conducted by Central Georgia Technical College (CGTC), a two-year, regionally accredited institution.

STAG Vets is serving as project lead, and is working with Comfort Farms, [Central Georgia Technical College](#) and [Fort Valley State University](#). The goal of this collaboration is to provide and prepare qualified farmers needed in Georgia's agribusiness supply chain to replace the state's retiring farmers. "We are excited about the amazing possibilities and the ability to grow farmers from every walk of life," Jackson said.

Fort Valley State Cooperative Extension Receives Grant to Assist Baldwin County Schools and Farmers Developing Communities, and Providing Opportunities

Fort Valley State University's Office of Community Development and Outreach, a part of FVSU's Cooperative Extension Program, recently received a \$224,914 grant from the U.S. Department of Agriculture (USDA) National Institute of Food and Agriculture's (NIFA) Food and Agriculture Service-Learning Program Grant. From October 7, 2020 until August 31, 2022, the grant (CFDA 10.522) will fund a first-time collaboration between FVSU's Cooperative Extension Program and the Baldwin County School District.

This will allow the Baldwin Grows Farm to School Community Action Committee, a collaborative group fostering innovative strategies, to strengthen their existing Farm to School (F2S) programming within the school district. Expansion of the F2S programming provides multiple benefits for students including nutrition, health, social and emotional skills, academic achievement, and school engagement. In addition, this funding can help increase and sustain current F2S efforts through the implementation of the following goals. This includes increasing capacity for food, garden, and nutrition education within the cafeterias and in the classroom. Funds will allow for the purchase of a greenhouse and small garden equipment to educate students about farming practices such as row gardening, hydroponic, and aquaponic gardening. Funds will subsidize the hiring of FoodCorps service members along with supporting professional learning opportunities for teachers and local farmers.

In addition, it will afford the Baldwin Grows Food Agriculture Service-Learning Program (FASLP) to further contribute to the community's health and sustainability by increasing child access to healthy and nutritious food options and improving farmer profitability by providing them access to stable, local markets. The project's goals and objectives outlined in this proposal align directly with FASLP project goals.

In addition to being classified as a limited resource area, the district serves households that encounter challenges, such as difficulty in achieving food security, housing stability, financial stability, and other socioeconomic challenges. FVSU Cooperative Extension is one of five awardees in the country to receive this grant. The USDA and NIFA made awards totaling \$960,000. For more information about the program, contact [JOY MOTEN- THOMAS](#)

Business Retention & Expansion (BRE) Courses

In-person: October 12 - October 13, 2021 (St. Paul, MN)

For inspiration, new skill development, or brushing up existing skills, we encourage individuals or teams to take the course. The course gives you the opportunity to prepare a new or updated BRE plan. It allows you to think through the right approach for your situation including two fundamental approaches to business outreach and follow-up action:

- The community-led, volunteer-intensive approach
- The staff-driven, continuous approach

What's new?

We're all learning how things are changing in the post-pandemic period. This includes BRE methods. Thus, we will discuss both new and traditional ideas and methods. We welcome discussion of new ways of doing the work. One thing hasn't changed; however, retaining and expanding businesses will continue to be the lion's share of local ED work for Minnesota communities.
